

T25 | Thermostat & Climate controller with 4 ventilation stages

DETAILS

- It allows to manage heating, cooling, humidity and ventilation stages.
- It can manage up to 4 ventilation stages with progressive and cyclic function.
- It is possible to connect to a humidity probe so in case that the humidity exceeds the maximum relative humidity then refrigeration will stop.
- It can control the temperature from -20°C to 80°C by adding a temperature probe.
 - Resolution 0.1°C
 - Accuracy $\pm 0.2^{\circ}\text{C}$
- Maximum Power: 3A per relay.

TECHNICAL SPECIFICATIONS

REFERENCE	T25
INPUTS	1 Temperature probe 1 Humidity probe
OUTPUTS	5 Relays 1 Configurable relay temp./humidity 1 (0-10V) outputs
VOLTAGE	230 V
MEASURES	170x132x82 mm
IP PROTECTION	IP55
NORMATIVES	89/392/EEC – 73/336/EEC – 73/23/EEC
