

V9 | Winch motor with battery for air inlets rising up to 100 kg

DETAILS

- It can rise directly 50 kg and up to 100 kg with hoist.
- It only needs a 0-10 V signal to be controlled. It can be also controlled by remote communication.
- It has 2 modes: automatic mode and manual mode. In automatic mode it is controlled by a 0-10V signal and in manual can be controlled directly from its front panel.
- Winch motor of 12V.
- It has emergency system and anti-exhaust system. In case of fault of electricity supply then the air-inlets go to emergency position.
- Built-in battery.
- It has a light sign to indicate when the battery is charged.

TECHNICAL SPECIFICATIONS

REFERENCE	V9
INPUTS	1 (0-10)V input
OUTPUTS	-
VOLTAGE	230 V
MEASURES	250x247x146 mm
IP PROTECTION	IP55
NORMATIVES	89/392/EEC – 73/336/EEC – 73/23/EEC
